

Declaration of conformity no. 3a/2007

1. Manufacturer of the building product :

Capricorn Sp. z o.o.
58-160 Świebodzice
Ciernie 11
Poland

2. Name of the building product:

Steel and plastic battery contact strips.

3. Classification of the building product:

Steel battery contact strips -
28.11.10-35.5
Plastic battery contact strips -
25.23.15-50.99

4. Scope of the building product intended use:

Battery contact strips are to fix conduits of water and sewage installations in the water uptake valve connection spots and in the sewage system disposal spots. Use of a battery contact strip at installation works enables a precise order of connection spots and dimensions adapted to fittings to be installed subsequently.

The strips are mounted at walls of sanitary premises and other places with the running water supply – in individual and collective living quarters, public utility buildings, as well as in industrial and storage buildings.

5. Technical specification:

Technical Approval by the Building
Research Institute (ITB) AT-15-7271/2007
“Steel and plastic battery contact strips”

6. Declared technical parameters of the building product:

Static strength of 1000 N applied to both elbows of the battery contact strip installed through appropriate openings should not cause a detachment of the elbows and/or a durable deformation of the strip of more than 1.5 mm. The temperature of softening of polypropylene battery contact strips should not be lower than 85°C.

7. Name of the laboratory and number of the report:

Report no. LOW/06305/2007 of tests conducted by Laboratorium Okuć i Ślusarki Budowlanej (*Building Fitting and Locksmithing Laboratory*) of the ITB, Wielkopolska Division - Poznań, ul. Taczaka 12.

On my entire responsibility, I hereby declare that the building product conforms to the technical specification mentioned in Article 5 above.
